(Affiliated to Anna University, Chennai)
DEPARTMENT OF CSE

UCS 2511 NETWORK LABORATORY

A3: Simple Client Server Connectivity

Faculty In-charge: Dr.N. Sujaudeen, Assistant Professor / CSE

Batch: 2020-2024 Year: III Sem: V Sec: A

Learning Outcome :

To be proficient in setting up client server connectivity using socket programming in C

Study:

Explain the syntax of all system call function required for simple client server connection and give examples for each.

Write the code using socket programming in C

1. Develop the basic code for communicating with server using the default system calls such as socket(), listen(), bind(), accept() in server side and socket(), connect() in client side. Use read() and write () on both sides to send and receive messages. Send a message from client to server side. (K3)
2. Extend the above program to send reply back from server to client.
